

Mountain Goat Sightings in the Bear River Mountain Range

Updated 8/18/2020

This document lists the sightings of mountain goats in the Bear River Mountain Range of Northern Utah as recorded by the Utah Division of Wildlife (UDWR). These sightings include UDWR employees conducting wildlife surveys as well as reports from the public who chose to share their observations. All sightings and images were reported to the UDWR voluntarily. The names of the reporting persons and the coordinates of the sightings have been removed for privacy purposes.

For more information about mountain goats in Utah please contact the UDWR at the telephone number listed at the bottom of this page.
