Logan City Mosquito Abatement has a long history of managing mosquito populations. But we can't do it alone. Managing water around your home can keep mosquito populations from getting out of control and reduce the risk of mosquito-borne illness. Together, we can keep mosquitoes and other vectors at bay.

Areas around your home to check and eliminate of standing water include: Bird baths, Clogged Rain Gutters, Buckets/ Containers, Tires, Wheelbarrows, Sprinklers don't over-irrigate your land-scaping the excess water can provide mosquito breeding habitat.

**NO STANDING WATER = NO MOSQUITOES**
